CERTIFICATE

This is to certify that the project report entitled **“ONLINE BIKE SERVICE MANAGEMENT SYSTEM”**, being submitted by **K Amrutha Varshini** bearing Roll No. **5174-23-862-013**. In partial fulfillment of the requirements for the award of the degree of **Master of Computer Applications** by Telangana University, Nizamabad is a record of the Bonafide work carried out by the student under our guidance and supervision during the period 2024-25.

INTERNAL GUIDE

Sri. K.RAGHUVeer
Associate Professor in CS

EXTERNAL EXAMINER

ACKNOWLEDGEMENT

We are grateful and would like to thank K. Raghuveer, Associate Professor of Computer Science, Nishitha Degree college, Nizamabad for providing us the facilities and resources required for the successful completion of our project. I also thank him for valuable suggestions at the time of seminar and also for his unique way of inspiring students through clarity of thought, enthusiasm and care. His constant encouragement and assistance were very helpful and made our effort a success.

I would also like to thank faculty and supporting staff of Computer Science Department and all other department for their kind co-operation directly or indirectly in making the technical seminar a successful one.

I am also grateful to Dr. K .Swapna, Principal for providing me with the facilities and resource required for the successful completion of my technical seminar. I also thank her for her valuable suggestions at the time of seminars encouraged me to give my best in seminar.

And finally, I also take this opportunity to thank each and everybody who has helped directly or indirectly during the course of this.

DECLARATION

We, hereby declare that the mini project thesis titled has been carried out entire guidance on
“ONLINE BIKE SERVICE MANAGEMENT SYSTEM ”

In the presence of K.Raghuveer

Nishitha Degree College, Nizamabad Affiliated to Telangana University, Dichpally,
Nizamabad for the partial fulfillment of the requirement for the award of Masters of
Computer Application, Department of Computer Science.

The reported result are based on the project work entirely done by me and not copied from
any other source. Further it has not been submitted to any other University or institutions for
the award of any other degree.

SUBMITTED BY,

K Amrutha Varshini

ABSTRACT

Now a day, technology is on a boost. People wish to live a luxurious life with minimum physical work. Here we provide an application for 'Bike Service System' using HTML and CSS.

This application is which can be run on any compatible tablets and mobile phones. The app will enable any bike user to search and communicate with any bike service center in the vicinity.

The user can find the service center, get its location and check and select any of the services provided by the respective service center.

The user can send request for pick and drop, appointment for servicing, test drive as well as accessories purchase to the dealer. The dealer processes these requests and gives a response back to the user through push messages.

Thus we are developing an application which goes hand in hand with the new age technology and characterizes – user friendliness, informativeness and time saving.

AIM OF THE PROJECT

Here we provide an application for 'Bike Service System' using HTML and CSS. This system enables user friendly for Admin-Customer relationship. Customer can easily maintain the multiple services. Then Admin provide update details about customer.

Bike service business is all about the time and quality. Reduce service downtime and plan service recourses including mechanics and equipment. Bike service management system functions and allows managing entire organization using this one system.

INTRODUCTION

EXISTING SYSTEM

Existing system is semi-manual and all work is done by paper and computer system. Customer can't see Job card details after servicing of bike. Only additional parts details can be viewed in bill. Records are stored manually regarding service. Existing system is time consuming and not user friendly.

PROPOSED SYSTEM

The purpose of this project is to provide Bike or any other automobile servicing system more effectively than the existing system. There are some disadvantages of the existing service center management systems. These disadvantages are overcome by the bike service center management system. And it can be made handily available to every person. Previously people could not get help or locate the service centers conveniently in case of their car break-down or any other emergencies. Thus BSCM is proposed to assist people and fulfill their requirements easily.

ADVANTAGES OF PROPOSED SYSTEM

- Easy to use because all Details of bike servicing will quickly available 24 x 7 on mobile.
- It can be easily accessed globally with help of Internet.
- Maintaining records will be easier because all details are stored in database and retrieved easily from it.
- Interactive and attractive design.
- Provides Alerts or Reminder by mobile app.
- Provides online booking of bike and servicing easily.
- Provides the user to pick and delivery the bike using mobile services.
- User can easily pick the nearby services center

© 2025 Bike Service Management System

CONCLUSION

The proposed paper shows the flow, structure and working of the Online Bike Service Management system. It is user friendly i.e. easy to use. It is free of cost on android store. Thus, it is a time saving as well as cost efficient application. So, we can conclude that the proposed system can be used to reduce human efforts and luxuriate human lives, hand in hand, with the modern technology.

FUTURE ENHANCEMENT

In Future work, This application to develop a cross platforms like IOS, etc. In adding the more features of bike service management system to develop access with user's flexibility. To authenticate the users based on the system users list which is maintained by the operating system. To restrict the usage of all files by the users based on their privileges on the system.
